

Domo Slide DS 45 M

A monofilament is a yarn that is extruded directly in a specific shape, which gives it a certain strength and also elasticity. These qualities were recognised by official bodies such as UEFA and FIFA as high grade. The standards for FIFA* and FIFA** were successfully satisfied. Domo® Sports Grass is also available with a new monofilament football system, Domo® Slide DS. This product has been specially developed to provide the best in terms of durability and playing properties. Slide DS is also a top football product at a highly competitive price.

The diamond profile guarantees outstanding durability. In the LISPORT set-up, a test setup for checking wear resistance, the fibre remains intact after 30,000 cycles. This equates to 15 years of normal football play.

Product Specification:

Yarn type: Monofilament Diamond Shape

Thickness: 250 Micron

Dtex yarn: 12.000 dtex

Origin: Made in Belgium

Test reports. Domo® Slide DS has been tested to all major standards:
