

Domo TopSpin

PE texturised monofilament yarn, half sand-filled, fully closed structure

• Flat stable playing surface

• Can be played on at all times, all year round, even after rain > easy-draining and quick-drying

• Excellent traction and strong grip on the court

• Various colours available (green, white)

• Built-in markings

• Consistent even bounce thanks to the closed structure of the grass mat

• Highly technical game (cpr): medium/fast, dynamic bounce

Additional advantages

• hard-wearing and uV stable A monofilament yarn is naturally strong and thus hard-wearing. This was established in the LISPORT test in which this product scored very highly. The solid PE monofilament means that the yarn is protected from the sun and consequently more UV stable.

• Perfectly controlled bounce The use of multidirectional texturised yarn means that Topspin is an extremely closed, dense grass mat. This closed playing surface gives an extremely controlled bounce.

• Attractive appearance Topspin has the natural look of an unfilled court. The filled sand is hidden by the texturised yarn. The mat is constructed in two shades of green.

• Minimal maintenance Topspin is a grass mat with texturised fibres which hold the grains of sand firmly in place meaning that the sand moves around less and resulting in minimal maintenance.
